## CONSTRUCTION PROJECT UPDATE OCTOBER 2019

# THE KINDERGARTEN LIFE

IT WAS A BEAUTIFUL DAY FOR PICKING APPLES! WE STARTED OUR FIELD TRIP AT HILLCREST ORCHARD BY EACH PICKING AN APPLE IN THE ORCHARD. NEXT WE WATCHED THEIR PROCESS OF WASHING AND HAND SORTING APPLES, AND FINISHED OFF WITH A SAMPLE OF FRESH PRESSED APPLE CIDER!

QUESTIONS WE PONDER: HOW CAN GOD BE ETERNAL? WHY DO CATS CHASE MICE? WHY DO THEY LOWER THE FLAG WHEN IMPORTANT PEOPLE DIE? HOW DO CACTI SURVIVE IN THE DESERT?

Party hats for our tour at Walnut Creek Foods

We discovered that spicy hard boiled eggs have a pretty bad smell!

Taking a tour of Commercial Savings Bank

Figuring out what temperature our pet lizards like to hang out at.

# 4TH GRADE NEWS

## Quarter 1

We love eating what we learn about (Buckeyes in Ohio History Class).

**We went to Walnut Creek Foods & the Commercial & Savings Bank in Walnut Creek for our field trip!**

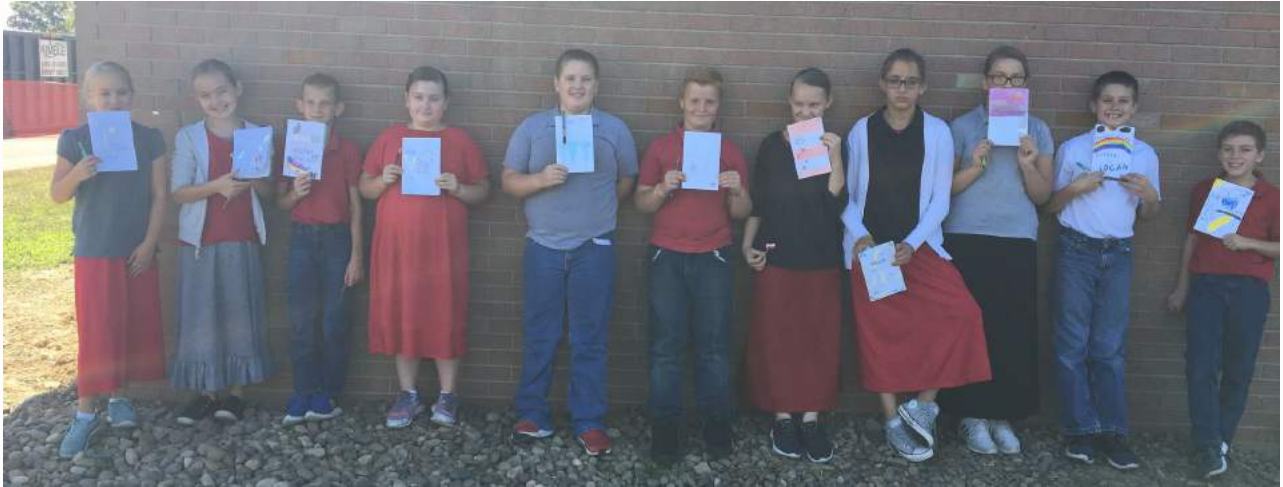

At the bank we had the chance to go into the vault and go behind the counter and see where they keep the money.

We had to wear hairnets to go on our tour in Walnut Creek Foods. 😊

# FIFTH GRADE

## THE LLAMA AND THE DINOSAUR

A FABLE BY MEGAN WEAVER

One deary day, a herd of animals decided to choose a leader for their herd. Among the animals, were two likely animals for the position; the llama and the dinosaur. The llama and the dinosaur each had one millennium to prove to the other animals that he would be a good leader, and the animals would choose a leader based on the happenings of the millennium. On the designated millennium, the llama gave deary, boring speeches and changed all the animals. He became very eager for power and started bossing around all the animals. On that same millennium, The dinosaur befriended all the animals and helped them with their needs and troubles. He set out to see how kind he could be to all his friends. At the end of the millennium, the animals chose the dinosaur as their leader.

Moral: To be a good leader, you must first be a servant.

# 6TH GRADE CLASSROOM

## SCIENCE CLASS

Lately we have been learning about earthquakes and volcanoes in science. Fun Fact: There are three different kinds of volcanoes; composite, cinder cone, and shield volcano. We have had very interesting science classes. - Mark Isaiah

We did an experiment to see who's house could last the longest in an earthquake. Ours looked like a tepee and won. It was a lot of fun. -Tyler

## STARBUCKS MODE

*"Sit where you want, just don't be the weird person in Starbucks who talks to strangers."*

We have tried a new study hall called Starbucks Mode. It means that you can sit wherever you want in the classroom. People are scattered all over the place. It's sad that Miss Janelle doesn't bring us iced coffee though, but I like it better than normal study hall. - Angela

## MATH CLASS

I think division doesn't come out right just to make you mad! - Isaiah Schrock

## JOKES AND RIDDLES

Student: Would you punish me for something that I didn't do?

Teacher: No, of course not!

Student: I didn't do my homework.

I have cities but no houses. I have mountains but no trees. I have water but no fish.

I am the beginning of everything. The end of everywhere. The beginning of eternity and the end of time and space but the second of the week.

Answers: (Map) (The letter E)

# Seventh Grade

## Quarter One

In the seventh grade classroom this year, we are adjusting to many new things. These include a new schedule, working with different teachers for different classes, having more homework than last year, and getting to know each other, which has been interesting and good for all of us. :) I didn't know any of the students personally before school started, but a few I recognized from Bible Quizzing. It's been fun to learn about each unique personality and characteristic of my students! -Miss Marcia

### Words of Life:

The past few weeks, us students have been given assignments in chapel. The assignments have all been to give certain people words of life. For example, this week we have been assigned to give a spoken word of life to someone in our chapel group. The idea is to get us into the habit of giving words of life on a normal basis. I would say it is definitely working! -Aubrey

A normal day in seventh grade starts with math. After math, we have history, Bible, science, and then lunch. We have breaks in between all of those classes. On Tuesdays and Thursdays after lunch, we have cleaning. We usually have English after lunch on Monday, Wednesday, and Friday. Some days are sort of chaotic. Dismissal is at 2:50. There are twelve people in our class. -Keith

We have had a lot of fun playing math review games! One of our favorites works like this: we split up into four teams. In front of the classroom is the stapler on a music stand. Everyone on the team can help to solve the math problem I give; one person writes down the answer. Another person, with the answer in hand, runs for the stapler. The first person to grab the stapler earns points for their team.

This is an excerpt from an imaginary letter about a one-of-a-kind babysitting job, written by Jacob for a grammar assignment.

Dear older brother,

Today I got my first babysitting job. I was babysitting a ten-month-old girl and a five-year-old kindergartner. The mom bet me an extra one hundred dollars if I could get the baby to walk. She also bet me another one hundred dollars if she would talk. She was already paying me five dollars an hour for twelve hours! Within the hour she was walking, and it only took her another hour to talk. Well, that was the easiest two hundred dollars I ever made. By the time her brother came home at four o'clock in the afternoon, she was almost running.

The boy was a little harder to take care of. He was always complaining that he was hungry. I think I fed him at least four meals once he came home!... At 7:00 p.m., the mom came home only to be surprised that her ten-month-old daughter was walking and talking. She paid me my two hundred sixty dollars and said she'll try to hire me next time. I said I'll try to teach her math next time, and then I left. By the end of my first babysitting job, I made two hundred sixty dollars. This was one very unexpected job.

Sincerely,  
Jacob

# FIRST THINGS FIRST

*A Quarterly Newsletter from the 8th Grade Classroom*

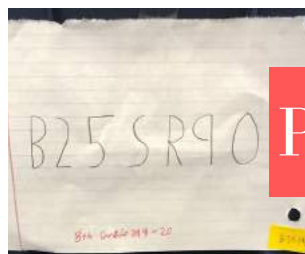

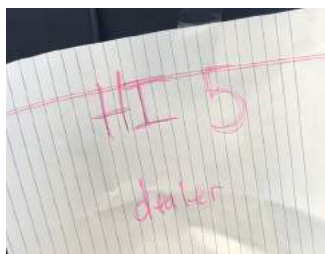

## FRONT ROW SEATS

Having a second floor window overlooking the construction project has made it exciting to see all the progress made on the new addition. The students all agree we need to add a door for a rooftop study area.

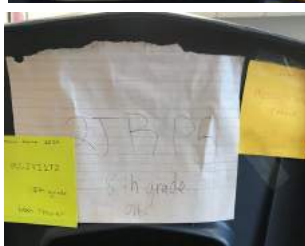

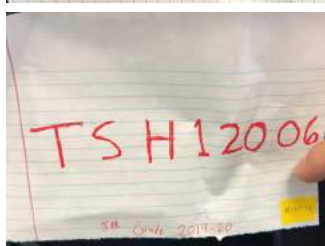

## FIELD TRIP

On Thursday we took a field trip to Gnadenuhuten and Schoenbrunn. Gnadenuhuten is the sight of the massacre of about 90 Christian Indians in 1782 by American militiamen. Seeing the less glamorous side of the settlement of the west was sobering for all of us

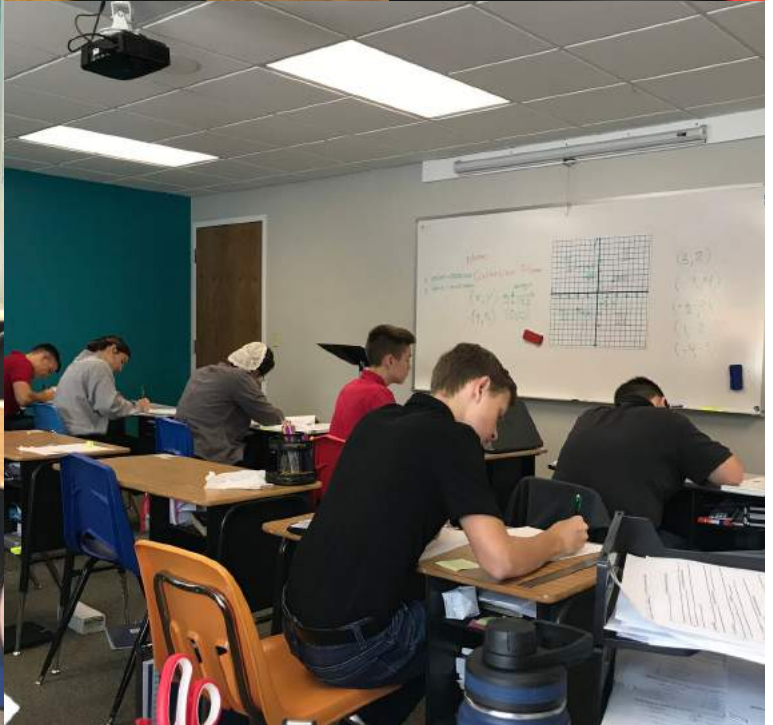

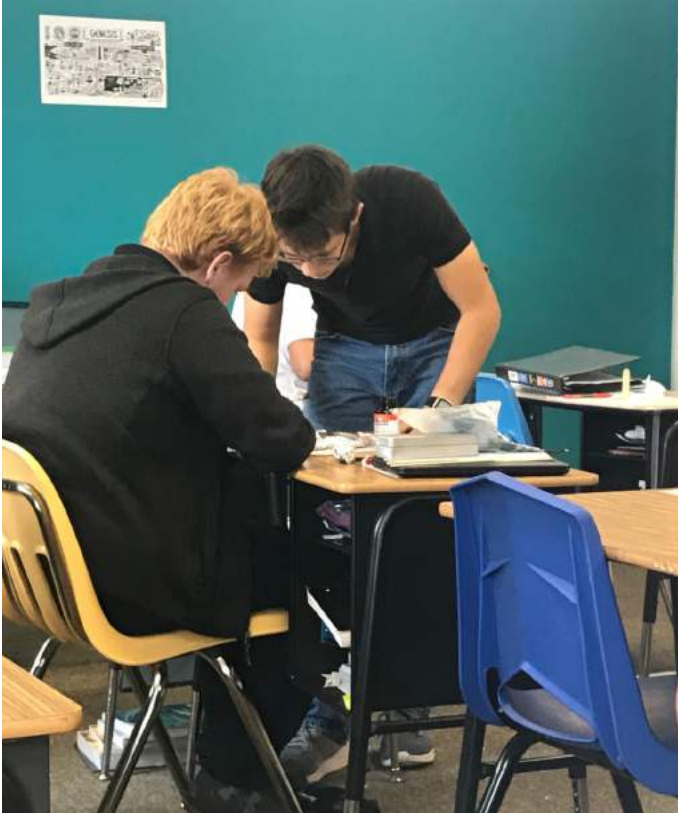

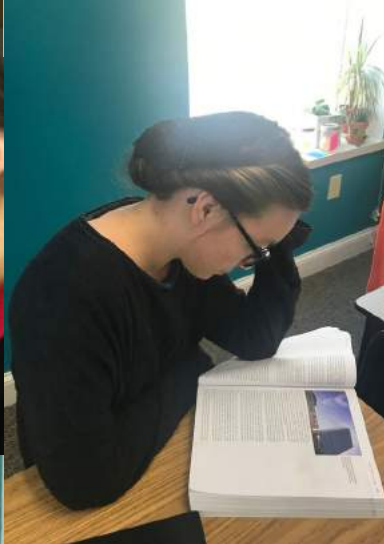

## PUSHING THROUGH

We are reading *The Pushcart War* during some of our study hall time, which inspired some of the students to make pushcart license plates and registration stickers for their chairs.

## CLASSROOM NEWSLETTER

### BACK TO SCHOOL

The school year is upon us in all of its glory. The slate is full with Algebra 2, English IV, Physical Science, and Geography being taught. Most students are also digging into foreign languages and extra music classes, creating lots of work, but also lots of learning!

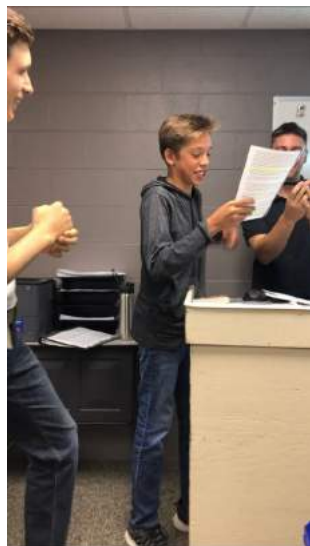

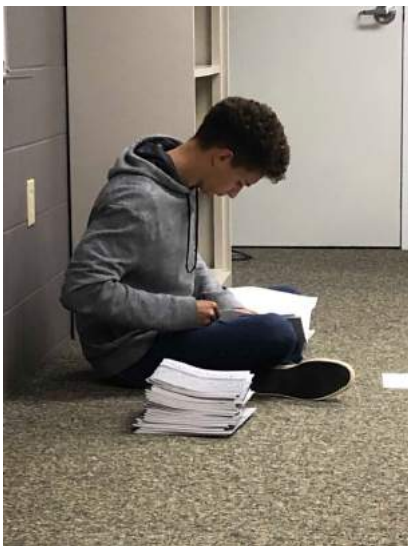

### YOUNG DIPLOMATS

In Geography class, the students have demonstrated their abilities to be potential, future heads of state. Pictured are several classroom leaders, hammering out the great Donut Treaty of 2019.

# 11 AND 12

## QUARTER 1

Report by Mr. Kipp

It feels like we just started the year, and yet here are, just two weeks from the end of the first quarter. Despite loud noises from construction, and faulty air conditioner units, we are still learning stuff! Routines, and schedules are mostly ingrained, and the rhythm of school is happening.

Its exciting to see the growth, gifts and abilities of these students, as they take on roles in student leadership. Looking forward to what's to come!

Eric - Adviser

# MUSIC @ LCS

All School Singing

## MUSIC IN OUR HEARTS

*Listening, Identifying, Analyzing, and also  
Creating beauty together with one voice!*

The roar of machinery/progress is in our ears including nail guns adding their very own "special" rhythms. In spite of the din, all-school singings, complete with vocal solos, duets, and instrumental pieces are an exciting way to end the week and are new for this year! It is rewarding to have the entire school together, praising God with one voice! Keep singing! Mr. Franklin
